Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Tuesday 13 Sep 2022 until 23:59 on Wednesday 14 Sep 2022

Forecast Issued on Monday 12 Sep 2022 at 16:53

Confidence: Low confidence in the details on Tuesday with the chance of some rain edging north into southern parts of the Brecon Beacons but a great deal of uncertainty in terms of how far north any rain gets. High confidence from Wednesday with dry conditions expected to dominate for the rest of the week and into the weekend.

Headline for Tuesday 13 Sep 2022: Dry at first but thickening cloud may bring some rain later in the day.

Mountain weather hazards on Tuesday 13 Sep 2022

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood

Forecast for Tuesday 13 Sep 2022

Weather: Low cloud may bring misty conditions over the highest ground during the early hours. Cloud breaking and clearing early on Tuesday morning to give some bright or sunny spells. Clouding over during the afternoon with a chance of some showery rain moving up from the south, and a low chance of the odd heavier burst by the evening. Showers or longer spells of rain remain possible through the evening.

Chance of cloud-free hill tops above 600m: 40% becoming 70% by 0900.

Low cloud and visibility: Periods of cloud above 500-600m at first, probably lifting and dispersing quite readily through the morning, however patches around 700m remain possible during any prolonged periods of rain later in the day. Generally very good visibilities but locally very poor in any cloud during the morning. Poor in rain later.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Showers or longer spells of rain will become more likely through the afternoon but northern parts of the National Park may well stay generally dry.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 12 Sep 2022	0mm	0.2mm	0.2mm

Forecast for Wednesday 14 Sep 2022

Weather: Early mist and shallow valley fog clearing to leave a fine day with warm sunny periods. The sunshine will be most prolonged in southern parts of the park with patchy cloud at times in the north.

Maximum wind: Northerly 8-15 mph with isolated gusts of 20 mph, mainly on exposed summits.

Chance of cloud-free hill tops above 600m: 80%.

Low cloud and visibility: Periods of cloud above 500m quickly thinning, breaking and then clearing by mid-morning. Largely very good visibilities but locally very poor in cloud and any early valley fog.

Temperature: **Valleys:** Plus 6 Celsius rising to plus 20 Celsius.
At 600m: Plus 8 Celsius rising to plus 14 Celsius.
Freezing level: Well above the summits.
